

Angeline “Chii” Viray

AI TRAINING & ENABLEMENT FOR COMPANIES & THEIR TEAMS

Fractional AI and operations lead for founder-led businesses, 12+ years operating. I build the workflows and decision systems that stop everything running through one person — and I teach teams to run them without me in the room.

Founder, Chiibitsu Labs Makati & Nuvali, Philippines · global hours labs@chiibitsu.com linkedin.com/in/angelinev

WHY COMPANIES BRING ME IN

“Everything still comes back to me.”

Decision structures, operating cadence, and accountability loops so the work stops queueing behind one person.

“We’re using AI but nothing got easier.”

Find the two or three workflows worth redesigning, build them with a human in the loop, and retire the rest of the noise.

“It only works when you’re in the room.”

Behavior design so the system survives handover. If your team can’t run it without me, it isn’t finished.

TRAINING & ENABLEMENT PROGRAMS

AI @ Work FOR YOUR TEAM

A live, in-person workshop for teams who have tried AI and got nowhere. Run at the Chiibitsu Labs HQ in Makati, or at your office. We work on your actual workflows, not demos.

You leave with: two or three workflows your team can run on Monday.

AI Incorporation Sprint FOR YOUR BUSINESS

One day together to map how AI actually fits your business, then I build it. Three levels: **Blueprint** (all three phases mapped for your team to build), **Foundation** (I build phase one), **Full System** (I build all three). Everything runs in your own accounts, so it stays yours.

You leave with: a working system, handed over, with the documentation to keep running it.

Private Sessions FOR LEADERSHIP

Working sessions on your own real work, in person. Not lessons — the last stretch of every session is you running it without me, with a check-in between sessions to catch what broke.

You leave with: a system you used that same evening.

EXPERIENCE

2019–now

Founder & Principal Consultant · *Chiibitsu Labs*

AI transformation, decision systems, workflow design. Full-time practice since 2024. I ship what I recommend: the workshops I sell, the operating systems I build for clients, and Lighthouse, the multi-tenant companion engine running in production on my own stack.

2024–2025

Head of Personal Development & Leadership · *The Lazy Lifter*

Behavior design lead across three seasons of a 100-day transformation program, growing from roughly 900 to 1,800 paid participants and now past 2,000, sitting on a free community of 75,000+ and an ambassador corps of 1,300 past clients. Built the prompts, rituals, and coach trainings that held adherence at that scale.

2023–2024	Country Manager PH → Global IR & Ecosystem Lead · <i>Suzuverse (AI + Web3)</i> Built Philippine operations from zero to 1,000+ users and 3,000+ community members, then managed country leads across five more markets and supported investor relations under the Chief Crypto Officer.
2022–2023	Co-CEO, Turnaround & Product Operations · <i>Talent Hero Ventures</i> Stabilised a global employer-of-record business ahead of a merger. Revenue, margin, and cash all recovered inside a quarter. Built the company's first operating dashboard.
2018–2019	Product Head, Crypto Wallet · <i>SCI Ventures</i> Founder vision into roadmap and MVP for underbanked users. Presented product readiness to institutional partners during investment and acquisition discussions.
2015–2019	Founder & CEO · <i>Beep a Ride, mobility</i> Built a regulated mobility platform from zero across Metro Manila, Cebu, and Palawan. Early chatbot and operations automation for booking intake and fleet coordination.
2013–2017	Escalations Manager → UX Designer · <i>HP Enterprise / DXC</i> Owned the complaints inbox routed to leadership for a large UK enterprise account, then moved into UX architecture for enterprise, mobility, and mixed-reality systems.

BUILT, AUTHORED & CREDENTIALS

BUILT & AUTHORED

Lighthouse · multi-tenant companion engine

Canon Chain Protocol

Chibie & Uno

Kizuna · relationship memory

ITIL v3 Foundations

HP Certified Technical Mentor

Also building: Lighthouse, a multi-tenant AI companion engine (identity, memory, privacy, governance built in), and the two products running on it — Chibie (personal) and Uno (a private chief-of-staff for founders, live and invite-gated). Proof the training is current, not recycled: I ship what I teach.
